

Aniket Kumar
Data & AI Engineer

Delhi • India • kumaraniket8802@gmail.com • +91 95608 82551 • GitHub • LinkedIn

Professional Summary

Data & AI Engineer with 2+ years of production experience building cloud-native pipelines, Medallion Architecture systems, and LLM-powered applications across international deployments on Azure and GCP. Engineered AI solutions in production using LangChain, OpenAI APIs, and OCR-based intelligence pipelines embedded in a commercial analytics product serving UK and NZ clients. Pursuing MCA in Machine Learning & AI to deepen model-building expertise alongside active engineering work.

Core Competencies

Python • SQL • Azure Functions • Google BigQuery • DBT • Medallion Architecture • ETL/ELT Pipelines •
LangChain • OpenAI API • RAG Architecture • NLP • OCR Pipelines • Transformer Models • Scikit-learn •
Data Modeling • API Integration • CI/CD Pipelines • Cloud Data Fusion • Power BI • MySQL • PostgreSQL •
Microsoft SQL Server

Experience

Acobloom International PVT. LTD.

Noida, Uttar Pradesh

Associate – Centre of Excellence (Automation, AI & Technology)

Sept 2025 – Present

- Independently evaluated and deployed an OCR-based financial intelligence pipeline — benchmarking Tesseract OCR, Python libraries, and cloud AI vision models — automating extraction and classification of transactions into standardized financial classes (Income, Expense, Asset, Liability) with direct database write, eliminating manual processing entirely.
- Drove LLM selection for a production LangChain-powered BI chatbot via rigorous performance-to-cost benchmarking; architected the production database layer enabling contextual natural-language query responses for business stakeholders.
- Architected a config-driven, multi-tenant Medallion Architecture (Bronze/Silver/Gold) pipeline on Azure Functions for a UK dental network (3 locations), processing 10,000+ records daily across 10+ tables — onboarding new clients requires only an API key update, with Power BI dashboards refreshing automatically on completion.
- Engineered a multi-API ingestion system across 4 platforms (Dentally, Xero, Boxly, Excel) with 50+ connectors; designed schemas and SQL views generating 100+ KPIs powering client-facing Power BI dashboards.

Indoqubix Cloudtech

Noida, Uttar Pradesh

Associate Software Engineer

May 2024 – June 2025

- Built Python ETL pipelines processing 500K+ daily records for a New Zealand taxi company with cross-server integration, automating end-to-end reporting across a 15-page Power BI dashboard — replacing a fully manual workflow.
- Designed and automated 25+ ELT workflows on Google BigQuery and Cloud Data Fusion, replacing manual Excel-based processes and saving 10+ hours of team effort weekly.
- Built an internal engineering performance platform integrating GitHub and Atlassian Jira APIs via Windows Task Scheduler, delivering Power BI dashboards tracking commits, sprints, ticket statuses, and story assignments for 30+ employees.
- Refactored SQL views and stored procedures for a US-based NGO, reducing query execution time by 30%.

- Led DBT-based healthcare pipelines (Tuva Project), delivering 4 client-facing Power BI dashboards (15+ pages) subsequently licensed as part of the company's commercial product.

Projects

Fearfall.Ai

GitHub

- Led development of an AI-powered public speaking platform (hackathon) that analyzes presentations and auto-generates PowerPoint summaries, cutting slide creation time by 60% and saving 15+ hours/week; integrated a domain-specific Q&A bot and peer community forum.

Abstract-Based Text Summarization

GitHub • *Live & Deployed*

- Designed and deployed a production NLP system using Python and BERT-based transformer models generating abstractive summaries of news articles and research papers — publicly deployed, demonstrating end-to-end ML pipeline ownership.

Virtual Kitchen

GitHub

- Built an AI-driven web application that analyzes available ingredients and recommends recipes with dynamic meal-portion calculators, supporting sustainable home cooking.

Education

Chandigarh University (Online)

Mohali, Punjab

MCA — Machine Learning & Artificial Intelligence

Feb 2026 – Present (*Expected 2028*)

Delhi Skill and Entrepreneurship University

New Delhi, Delhi

B.Sc. Data Analytics | CGPA: 8.7

Dec 2021 – Sept 2024

Certifications

- IT-ITES Sector Skill Council (PMKVY) — Software Development Certification
- Data Analysis with Python — Course Certification
- Microsoft Power BI Data Analyst PL-300 — Exam Preparation (Udemy)
- Tableau for Beginners — Course Certification

Technical Skills

Programming & Query: Python, SQL

Data Engineering: Azure Functions, Medallion Architecture, Google BigQuery, DBT (Data Build Tool), ETL/ELT Pipelines, Cloud Data Fusion, Data Modeling, API Integration, CI/CD Pipelines, Windows Task Scheduler

AI & Machine Learning: LangChain, OpenAI API, RAG Architecture, NLP, OCR Pipelines, Transformer Models (BERT), Ollama, Scikit-learn

Databases: MySQL, PostgreSQL, Microsoft SQL Server

Analytics & BI: Power BI, Grafana, Looker Studio, Tableau, Excel (Advanced)

Languages: English (Fluent), Hindi (Native), Japanese (Beginner)
